Stephen	Specialist repairs models	N
Everybody	Learn more about JavaFX events	N
Person 6		
Person 6		

Max three rows per group member. Task status: (N) new (O) ongoing (X) no report

Other Issues and Risks

Hibernate is still proving a little difficult, however team members are settling into it. Using Git is a bigger challenge as NetBeans makes merging and pulling from master even more complicated than it needs to be, and some of us are confused by what to do. A lack of experience with Git and/or NetBeans is slowing down some team members. Using FXML is proving difficult as SceneBuilder is a steaming pile of garbage unreliable and FXML itself is not as intuitive as HTML.
